ACADEMIC PROJECTS

- ❖ **Devraj's Blog – Website** [Visit Site](#)
I created a daily blog website named "Devraj's Blog" as part of a college project. The website included essential pages such as home, blog list, blog details, gallery, and contact us. To build it, I utilized fundamental HTML, CSS, and JavaScript.
- ❖ **Attendance System – Program** [Visit Site](#)
I created an attendance system in my first semester of college. The program stops manual attendance tracking problems and automates recording, making it accurate, saving time, and lessening paperwork. I used C Programming to build the system.
- ❖ **Motivation Quotes Generator – Website** [Visit Site](#)
I created a website that generates random inspirational and motivational short quotes for users. It retrieves them through a GitHub API. Users can copy the quote to the clipboard, listen to the text, and generate new ones. You used HTML, CSS, and JavaScript to create it.
- ❖ **Samachar Hub – Website** [Visit Site](#)
I created a news site that provides worldwide news across different categories such as Business, Technology, Sports, Politics, Lifestyle, etc., for viewers. I utilized the newsapi.org API to fetch the news. HTML, CSS (Bootstrap), and JavaScript were employed to develop it.
